

The Company

Morland manufactures timber-based products used in interior fit out in industries across the UK and Europe. Founded in 1972 and still in the same private ownership, the business delivers over 50,000 cubic metres of decorative panels and a million metres of architectural profiles every year.

The company's vision is to supply high quality fit out materials that are fully finished so the customer only has to assemble and secure the fix: "flat-pack fit out." All of the machining, cutting, drilling and decoration is undertaken by Morland within quality controlled factories; the ISO 9001:2000 standard is operated across the business.

Morland supports lean manufacturing by providing a true Just In Time delivery service of batch specific materials to rolling production line schedules. A powerful M.R.P. system and an organisational structure that has staff dedicated to order fulfilment, ensures outstanding service levels.

Today our supply chain is worldwide. We import quality materials from long term supply partners across the globe. Our environmental policy prohibits the use of illegally logged timber and supports sustainable forestry. Morland has both FSC and PEFC certification for the purchase, processing, sales and distribution of certified timber.

Product Ranges

Panels

Morland is one of the UK's leading producers of wood-based decorative panels. Our expertise in the combination of board and covering allows us to tailor cost effective products.

An extensive choice of board materials and coverings are available, depending on the required application. Morland is part of the Newmor Group and operates alongside Newmor wall coverings. Visit www.newmor.com to see the fabulous range of wall coverings available.

As well as Newmor wallcoverings, Morland offers a range of decorative surfaces from Abet, Arpa, Egger, Polyrey and Wilsonart

By having the ability to bond laminate to BS EN 204:2001 and to undertake shaped and curved edge banding, Morland can realise the concepts of designers looking for attractive panel products. Whether it is a worktop for a caravan, or a wet wall system for a modular changing room, Morland can provide the product to suit.

Profiles

Morland offer a broad range of decorative finishes on a variety of substrates to deliver a sophisticated solution

to achieving a co-ordinated fit-out. For example, the same finish can be applied to MDF, aluminium and plastic to allow clients to combine substrates depending upon the application of the profile.

This approach allows Morland to fine tune the profile to suit the purpose exactly. Our technical department can take a rough sketch to produce a fully detailed CAD drawing for approval prior to manufacture. Once approved, that drawing becomes integral to the manufacturing process and is embedded within the works order.

Prefit

Morland Prefit offers joinery and furniture items that are fully finished. For anyone fitting out and wishing to avoid wet trades, Morland Prefit can help.

We sell internal timber fully finished doors, ranging from melamine faced hollow core doors to veneered FD60 performance doorsets.

We supply case goods ranging from face frame robe systems and drawer boxes through to bed carcasses and furniture components.

Our expertise with light weight materials allows us to offer worktops and table tops that perform to high standards yet weigh remarkably little.

We supply wall panel systems that can be lightweight, curved or suitable for wet rooms.
